

SOYANG[®] Technologies **Ultra-thin light box + SoFlat-Backlit**

Ultra-thin light box

Space-saving:

High fidelity:

Low energy cost:

Environmental-friendly:

Easy application:

a $\frac{1}{4}$ thickness of traditional light box
images **don't yellow** under illumination

80% less than a traditional light box

95% of components are recyclable

its simplicity means it is **easy to install and maintain**

SoFlat-Backlit

- > Uniform transparency
- > Super smooth surface
- > Anti curl properties
- > Excellent printing performance for high resolution images

Ultra-thin light box and SoFlat-Backlit used together provide a fantastic combination that offers low profile, easy install, superb illumination from the light box and also excellent backlit graphics from the SoFlat. It is ideal for use in shopping malls, restaurants, museums, and art galleries where high resolution images are desired & also subway stations, public passages etc. where space is very limited.
